3500 Gaston Avenue, Dallas, TX 75246

Questions? EMAIL: Annette.King@bswhealth.org
PHONE: (214) 820-2317
Overview
The purpose of the symposium will be to update physicians and other health care professionals regarding the evidence supporting current clinical practices in pulmonary and critical care medicine. The information and strategies presented are intended to enhance clinical competence in the diagnosis and treatment of pulmonary and critical care medicine disease states.

Target Audience
Primary care physicians, pulmonologists, intensivists, nurse practitioners, physician assistants, respiratory therapists and other health care professionals interested in pulmonary and critical care medicine.

Accreditation and Credit Designation Statements
The A. Webb Roberts Center for Continuing Medical Education of Baylor Scott and White Health is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The A. Webb Roberts Center for Continuing Medical Education of Baylor Scott and White Health designates this live activity for a maximum of 7.50 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Conference Location
Baylor University Medical Center
Roberts Hospital, 17th Floor Conference Center, 3500 Gaston Avenue, Dallas, Texas 75246

Objectives
Upon completion, the participant should be able to:
• Discuss the current incidence of pulmonary embolism, recognize the “Post PE Syndrome” entity, learn to appreciate the different classification model and gain knowledge on when non-pharmacological therapies are indicated
• Interpret the emerging modalities in the field of interventional pulmonology for the purpose of learning when patients should be referred to such interventions
• Identify new therapies in the management of asthma, familiarize themselves with atypical asthma cases and understand the complexities in managing recalcitrant asthma cases
• Review interstitial lung disease as an entity in the field of pulmonary medicine, recognize diagnostic criteria and associated radiographic findings as well as familiarize themselves with emerging therapies
• Identify updates in transplant practices for both harvesting and organ transplantation
• Execute mass casualty trauma plans to include triage and local protocols
• Identify the new advanced medical and non-medical therapies for heart failure
• Review treatment strategies with the identification of new screening methods for acute kidney injury in the ICU

Learning will be done via audience response interactive lectures.
